

Provincial Emergency Coordination Centre

Spring Freshet – Information Report

June 7, 2007 2000 hours

It is extremely important to be prepared for emergencies. Assemble and keep an emergency kit that contains enough supplies to support you and your family for at least 72 hours.

Local Authority Response Activity

An ***Evacuation Alert*** means residents may be asked to leave their homes on very short notice. Residents should prepare by organizing an emergency supply kit with necessary medications, personal toiletries, change of clothing and personal and family documents.

An ***Evacuation Order*** means there is an imminent risk and residents must leave the area immediately. Local police or RCMP enforce the order.

Local Authority	EOC Status	Local State of Emergency	# on Evacuation Alert	# on Evacuation Order	Web Site URL
NORTHEAST					
Prince George	Activated	Y	approx. 70 homes	approx. 9 homes	www.city.pg.bc.ca
Fraser-Fort George Regional District	Activated	Y	approx. 60 homes		www.rdffg.bc.ca

Overview

A relatively dry day across the province has allowed river levels in most areas to stabilize. Cool temperatures continue to slow the rate of snowmelt in all river basins. A low pressure system continues to push through the province. Sunday and Monday will see unsettled weather as this low pressure system pushes through the province.

Flooding in areas throughout the Northeast and Northwest of the province continues at this time. New flooding issues have developed along the Columbia River near Golden and along the Liard River near Lower Post. Flooding will continue throughout the Northwest and Northeast of the province for several more days.

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.

Northeast Region

A **Flood Warning** is in effect for the Upper Fraser River (McBride, Prince George, Quesnel and other locations along the Fraser River). River levels in the Upper Fraser River have begun to recede but remain above flood stage. The Upper Fraser is expect to stay above flood stage through the weekend and into next week.

The Upper Fraser River at Prince George is above flood stage.

A **Flood Warning** is in effect for the Liard River.

Unsettled weather is predicted to continue for the rest of the week, with near or slightly below normal day-time temperatures, and periods of rain.

A **High Streamflow Advisory** is in effect for the Southern Peace River. River levels are expected to continue to rise over the next several days.

Northwest Region

A **Flood Warning** is in effect for the Skeena River. The rate of rise has slowed but the river may continue to rise very slowly for the next day or two, as snowmelt continues adding water. Flooding is occurring along unprotected sections of the Skeena valley, near Terrace and in other communities along the Skeena.

A **Flood Warning** is in effect for the Bulkley and Telkwa rivers.

The Skeena and Bulkley Rivers continue to run at well above flood stage and remain at or near their peak flows.

A **Flood Warning** is in effect for the Nass River. Flooding is anticipated in unprotected sections of the Nass Valley. The Nass River peaked at noon on Tuesday and is now receding.

A **High Streamflow Advisory** is in effect for the Nechacko River.

The potential for higher water flows remains on the Skeena, Bulkley and Nass rivers, depending on the weather and the volume of snowmelt.

Central Region

A **High Streamflow Advisory** is now in effect for the North Thompson River upstream of Kamloops. (Birch Island, Clearwater, McLure). It is expected that the North Thompson River will remain close to current levels through the weekend and into next week.

Southeast Region

A **Flood Warning** is in effect for the Columbia River (Golden).

A **High Streamflow Advisory** is in effect for the Slocan River, Illecillewaet River (Greeley) and Kicking Horse River (Golden).

The Slocan and Lardeau Rivers continue to recede.

Southwest Region

A **High Streamflow Advisory** is in effect for the Lower Fraser River, encompassing the area between Hope and the ocean. The lower Fraser is expected to peak Saturday through Monday. The greatest risk factor for greater volume in the next two weeks is a widespread rain storm event of 30 to 60 mm, which is not forecast.

Flooding is anticipated to occur in areas unprotected by dikes.

The flood risk season for the Lower Fraser will not be over before the end of June.

A **High Streamflow Advisory** is in effect for the Lillooet River (Pemberton/Mt Currie).

River Level Situation and Forecast:

Highway Conditions:

Highway 16 is closed in both directions between rock slide 37 kilometres east of Terrace and flooded area 48 kilometres east of Terrace. An alternate route between Terrace and Kitwanga via Cranberry Forest service road is available with scheduled 30 minute openings in alternating directions every 2 hours.

Nisga'a Highway is closed in both directions from Gitwinksihlkw (Canyon City) to Greenville due to flooding and shoulder erosion.

Highway 51 is closed in both directions 20 kilometres east of Telegraph Creek due to wash out.

Usk ferry service has been suspended.

Ferry service in Little Fort and McClure has been cancelled.

CN Rail line is closed from Smithers to Prince Rupert (along Highway 16 corridor). Shames Flat portion of the railroad track has washed away due to water erosion.

For the most up-to-date information on this situation and others, visit www.drivebc.ca or call toll-free 1-800-550-4997.

Provincial Response Activity:

A toll-free provincial flood information line is operating from 8 a.m. to 8 p.m daily. The number is: 1-888-350-6070.

Provincial government staff are monitoring river levels, and together with local government officials and First Nations bands are reviewing potential threats to the public, infrastructure and the environment.

The Provincial Emergency Coordination Centre in Victoria is activated.

Provincial regional emergency operation centres in Terrace, Prince George, Kamloops, Nelson and Surrey are activated. Staffing is being increased in the provincial centres at Prince George, Terrace and Surrey.

The province's logistical preparations include sandbags, sandbag filling machines, and other flood fighting materials. Nearly four million sandbags have been distributed to local authorities. Approximately 290,000 sandbags have been shipped since June 6th to meet local government requests throughout the province. Ministry of Forests firefighting crews are being used for sandbagging operations in support of local governments.

An Agriculture Notice -- Livestock Relocation Phase 2 and 3 was issued June 2 by the Ministry of Public Safety and Solicitor General and Ministry of Agriculture and Lands.

The Ministry of Agriculture and Lands has an emergency operations centre in Abbotsford. It is providing flood awareness information and guidance on managing livestock in preparation for flooding.

For more information on the relocation of cattle and emergency preparedness planning, dairy farmers are asked to call the BC Milk Producers Flood Line at 1-877-859-6140 or click [here](#). For more general information on agricultural emergency preparedness, farmers are asked to contact the MEOC in Abbotsford toll free at 1-888-221-7141
